VELUTEX FLOCK S.A. ENVIRONMENTAL POLICY

VELUTEX FLOCK S.A. establishes as Environmental Policy to contribute to the sustainable economic development and environmental conservation. For this reason, it has defined the following principles and action plans

1. **Comply with the current legislation** applicable to environmental matters, maintaining a constant review of its parameters and its permanent adaptation.
2. Apply the commitment to a continued **reduction of the impact** of our activity on the environment, promoting environmental awareness among all employees, with appropriate training and motivation programs.
3. Share the content of this **Environmental Policy** among our employees, contractors, suppliers and collaborators.
4. Establish a process of **continuous improvement** of our environmental behavior and pollution prevention through specific plans to **reduce greenhouse gas emissions**.
5. Promote **energy efficiency**, as well as **savings in water consumption** in our production process.
6. **Minimize waste production**, reusing and recycling as much as possible.
7. Monitor **compliance** to applicable **Product Health and Safety regulations** in our range of articles and in the products used in the supply chain.
8. Collaboration with organizations and technological centers for the **development of products, techniques and certifications** aimed at guaranteeing an improvement in our environmental performance.

These principles should serve as a guide for all personnel, so that by integrating this policy into the company's planning and management, a coherent response is ensured in activities related to the environment.

To ensure this effective application of the Policy, the Management of VELUTEX FLOCK S.A. annually establishes environmental objectives that are subject to continuous monitoring.
